

**IMPORTANT**

For optimum performance, antenna must be cut to the proper length before use.

**CUTTING INSTRUCTIONS**

1. Remove cap from the antenna.
2. Align bottom of antenna with bottom (0 line) of antenna on corresponding cut diagram.
3. Mark antenna for the cutting length corresponding to the desired frequency indicated by the frequency scale on the cut diagram.
4. Cut the antenna.
5. Apply glue (Motorola part number 1100842335) to the top of the antenna, and replace the cap.
